## Overview of accessibility

## Description of the building

The building is a part of a city block and has three above-ground floors. It is the seat of the dean's office.

### Entrance

The surface of the access pavement is made of even concrete paving.

The double entrance door (main panel width 93 cm, side panel width 95 cm) with one step (height 19 cm, depth 44 cm) opens mechanically inwards. The doorbell (height 148 cm) is located on the right of the door above the step.

### Interior

After the entrance to the left, there is a reception area (door width 2x 60 cm) located above a short staircase (3 steps up).

The right and left sections of the building are accessed from the entrance hall by stairs (4 steps up). The elevated ground floor and the next floor are connected only by a staircase.

The manoeuvring space in the interior is sufficient. The doors of offices, classrooms, study rooms, and other passages have a minimum width of 80 cm.

## **Lift**

No lift is available in the building.

## **Sanitary facilities**

The building has only standard toilets, which are located on all floors.

## **Parking**

There are three reserved parking spaces in the parking area on the opposite side of the street. The adjacent crossing is equipped with lowered curbs.

## **Public transportation**

The nearest public transportation stop is the "U práce" stop. All directions for the stop are located at the adjacent traffic light, about 200-400 metres from the main entrance on a flat surface. Access to the building is without major problems. For more information, see [www.pmdp.cz](http://www.pmdp.cz)
