Overview of accessibility

Description of the building

Building C is a part of the extensive campus in Troja. The complex is made up of five buildings that house the departments of the physics section, two faculty library branches, and the Language Education Office. The Department of Low Temperature Physics is located in the Cryogenic Pavilion "C".

Accessibility and transportation

Public transportation

The bus stop Kuchyňka (bus 201) is located approximately 250 m from the building. The bus runs to the Nádraží Holešovice stop, where it is possible to take the metro (line C). For more information, see www.dpp.cz.

Parking

There is a large parking area in front of the building with no reserved parking spaces.

Entrance

The surface of the access road from V Holešovičkách Street, where the public transportation stop is located, is made of asphalt with a long longitudinal slope (6%-12.5%). The immediate area around the buildings with the parking area is either flat or has a slight slope.

The double-panel entrance door of the pavilion (width 2x 85 cm) opens mechanically outwards. The doorbell (height 162 cm) is located on the left side of the door. From the vestibule (width 297 cm, depth 164 cm), another double door (width 2x 85 cm) leads to the interior, which opens mechanically towards the vestibule.

Interior

Both floors of the building are connected by a lift. The manoeuvring space in the interior is sufficient. The doors to the classrooms, offices, and other passages have a minimum width of 80 cm.

Lift

A lift (automatically opening door width 80 cm, cabin width 110 cm, depth 140 cm) connects the 1st and 2nd above-ground floors. The manoeuvring space in front of the lift is sufficient. The cabin with a pull-down seat is also equipped with a handle (height 88 cm) and a mirror on the front wall. The controls at the entrances have a maximum height of 110 cm. The maximum height of the controls inside the cabin is 124 cm.

Sanitary facilities

The building has two modified toilets with the same parameters located on the 1st and 2nd above-ground floors opposite the lift. Both accessible stalls (door width 80 cm, stall width 160 cm, depth 179 cm) have direct access from the central corridor without a hallway. The single-panel toilet door is marked and opens mechanically outwards. Access to the toilet when looking from the entrance into the stall is on the right. The space for a wheelchair next to the toilet is sufficient (width 95 cm). The toilets are equipped with one pull-down and one fixed handle.
