Overview of accessibility

Description of the building

The Department of Physiology and the Department of Pathophysiology of the 3rd Faculty of Medicine of CU are located in a historical preserved two-storey building.

Entrance

Pedestrian access to the building from the nearest public transportation stop in Wenzigova Street leads along a pavement with smooth tiles.

The main entrance to the building is not barrier-free. A barrier-free secondary entrance is not available. The double-panel door of the main entrance (main panel width 73 cm, secondary panel width 76 cm) with a stone threshold (height 4 cm) opens mechanically inwards. A doorbell (height 143 cm) with a two-way communication system is located to the left of the door. There is a reception area behind the entrance. Immediately behind the single-panel door (width 86 cm) which closes the vestibule, there is a staircase (11 steps up) to the 1st above-ground floor.

Interior

The floors of the building are connected only by multi-level staircases. The doors dividing the corridors and the doors of the individual rooms are mostly double-panel (minimum width 2x 58cm). The manoeuvring space is restricted in places.

Lift

There is no lift in the building.

Sanitary facilities

The building has only standard sanitary facilities.

Parking

Reserved parking spaces are not available.
