## Overview of accessibility

## Description of the building

The garden of medicinal plants with a teaching and operations pavilion and a greenhouse is a special-purpose facility of the Faculty of Pharmacy of Charles University. The garden is for the cultivation of medicinal plants for educational and research purposes.

## Entrance

The unfrequented Botanická Street without pavements leads to the entrance to the complex. The surface of the road is paved with asphalt. The area in front of the entrance gate is paved with a strip of rough tiles. Next to the entrance gate is a pedestrian gate (width 93 cm) with a doorbell (height 142 cm).

The walkway for the complex, which leads from the gate to the operational building, has a surface of high-quality concrete paving.

The entrance to the ground floor of the building is on the right. The double-panel door (main panel width 85 cm, secondary panel width 94 cm) with a doorbell (height 131 cm) and chipreader (height 115 cm) opens mechanically inwards.

To enter the 2<sup>nd</sup> above-ground floor, there is a walkway to the left that slopes up along the greenhouse, (gradient 5% to 10%). There are three entrances: a double-panel automatic door (out of service at the time of mapping 7/2022), a single-panel door (width 67 cm) with a doorbell (height 138 cm) and chip reader (height 129 cm) that opens mechanically inwards, and a single-panel door (width 98 cm) without a doorbell.

The floors are connected internally only by a staircase.

The greenhouse adjacent to the building is not barrier-free with a system of stairs and unpaved footpaths. There is also a roof terrace that is not barrier-free, which is only accessible by a spiral staircase.

The level garden is interspersed with paved walkways, primarily with high-quality concrete paving.

## Interior

On the ground floor, there are technical facilities, changing rooms with regular showers, a laboratory, and a file room. The door is a minimum of 80 cm wide with thresholds up to 2 cm.

On the 1<sup>st</sup> above-ground floor, there are two seminar rooms with movable furniture (tables with a 70 cm space underneath), offices, and a modified toilet stall.

The manoeuvring space in the interior is sufficient.

## Lift

There is no lift in the building.

## Sanitary facilities

The partially accessible stall on the 2<sup>nd</sup> above-ground floor (door width 90 cm; stall width 167 cm, depth 158 cm) is separate. The single-panel door to the toilet is marked and opens mechanically outwards. Access to the toilet bowl from the stall entrance is on the right. There is enough space for a wheelchair next to the toilet bowl (width 103 cm). The toilet bowl is equipped with one pull-down and one fixed handle. At the time of mapping (7/2022), the stall was used as a storage space for cleaning products.

## Parking

Reserved parking spaces are not available. However, there are parking spaces in the parking area in front of the main entrance.
