
Note taking services

The notes can be compared to notes taken during class. The notes can be supplemented (esp. by the teacher) with more details that are substantial from the point of view of the topic.

Note taking services are provided as a part of the [study assistance service](#) . The students/assistants taking the notes can ask to be trained in note taking by workers of the [Institute of Deaf Studies at the FA CU](#) and avail themselves of their methodological support.
